

IWB-2 bb

## IWB Wall Boxes

Intuitive's second generation of IWB (In Wall Box) is the most flexible, easiest to install, and best built box on the market. With its removable trim ring it can be easily installed into a standard 2 x 4 stud bay during pre-construction, or retrofitted after the home is complete. Heavy duty "Dog Ears" install from the inside, securely mounting the box to the wallboard. Our dual power punch-out uses either metal or plastic power boxes for the utmost in flexibility. You can directly mount wall plates to the outer edge, keeping the installation clean. Built from welded and powder coated steel, this box is durable and will withstand the test of time.

IWB-1 bw

IWB-1 sb
