

Intuitive CMP-XL

Built on the same platform as the CMP-1, the CMP-XL offers a larger mounting area. With a 15" x 15" breadboard, the surface is over twice the size of the CMP-1. Now you can fit larger devices such as amplifiers with ease.

The VESA adapter arm easily attaches to the rear of the display, using up to a 400mm bolt pattern. The breadboard plate then attaches to the adapter arm, for ultimate flexibility.

Built from powder coated steel, the CMP-XL will display the quality of your installation and last a lifetime.

- Made from 1.5mm (.06") Thick steel
- Heavy duty black powder coat finish
- Attaches to VESA patterns from 50 to 400
- Separate VESA mounting plate and breadboard for installation flexibility
- Huge 15.00" x 15.00" mounting platform
- Increased reliability for all of your installations

**LIFETIME
